Experience with SQL (MySQL) and NoSQL (MongoDB).

Adaptability, collaboration, and attention to detail.

LANGUAGE

Tagalog

English

Masbang, Coleen Isobelle
Web Developer

ABOUT ME

I am a fourth-year Information Technology student at Holy Angel University, specializing in Web Development. While I enjoy both front-end and back-end development, I am particularly passionate about web design, especially using WordPress and frameworks like Angular and Bootstrap. I also have a strong interest in back-end work and database management. My studies have deepened my understanding of web design and back-end systems, and I am flexible in contributing to both areas. I am eager to apply and further develop my skills in these fields.

OBJECTIVE

To secure a back-end development role, with a focus on database management and server-side programming, while remaining flexible and open to front-end tasks as needed. I aim to contribute to innovative projects and continue growing my skills in both areas.

PROJECTS

Mangan Tamu!   **2023**
Group Project

A responsive website showcasing Kapampangan cuisine, featuring a menu, reservation form, event hosting details, and social media integration. Developed using HTML, CSS, JavaScript, Bootstrap, and MongoDB for dynamic data management. My role was primarily as a Quality Tester, with additional contributions to various aspects of the project.

Gamat Kapampangan   **2024**
Group Project

As a back-end developer on this project, I contributed to the development of a web application designed to showcase the work of GK artists and provide them with an opportunity for greater exposure.
